

### 1. Ticks:

Pest control has been informed.

Has been addressed by Lo

### 2. Move out event:

Last week of June, coordinated with the Office of Sustainability

Until July 1st.

Will need volunteers, and I will send out a volunteer form sometime at the beginning of June once I have confirmed details.

Hold near Meadows Cafe Area since it will not be occupied at that point

Volunteers will be needed, a form will be sent out for that. Just need Chris to confirm

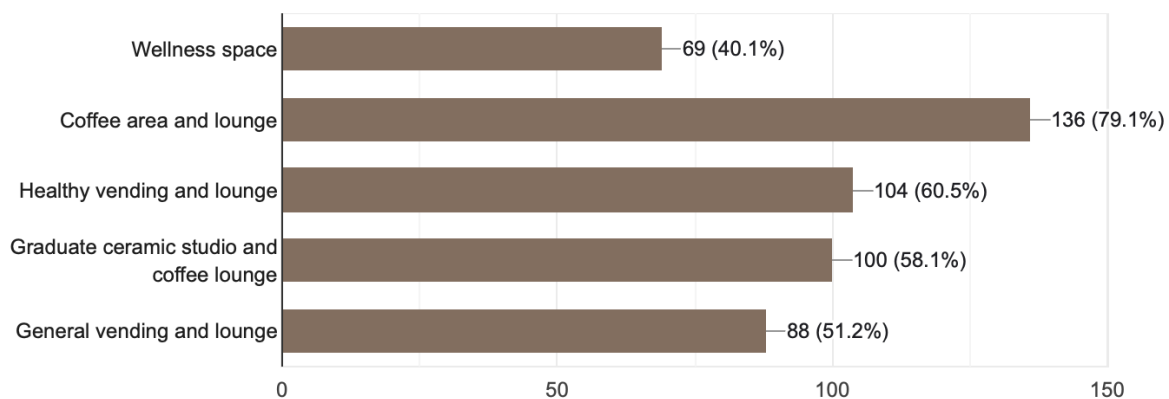

### 3. Meadows Cafe feedback:

Feedback will be sent to Naddeem/ Lily Secora today.

Key information:

- Majority wants some coffee option (see below)
  - bring your own pods and have coffee available
- Many want small grocery items to be available.
- Seems a multipurpose yet cohesive space would fit the needs of many at Meadows.

The following information is a select all that apply. I asked respondents to select every option that appeals to them.

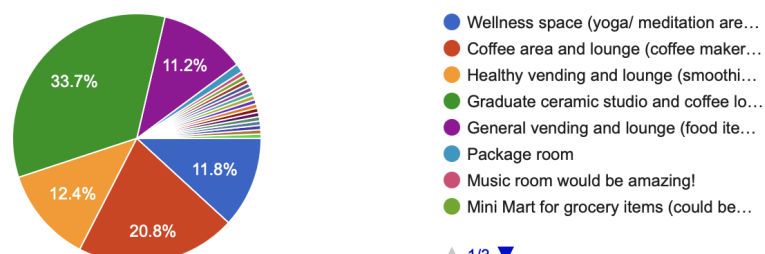

Other notes:

Many would love the option of dual space ceramics studio, although this is a much less budget-friendly option. Since the undergraduate ceramics studio is no longer available to graduate students, many appreciate this idea (see above). Additionally, when

Which option appeals to you the most?

178 responses

Copy chart

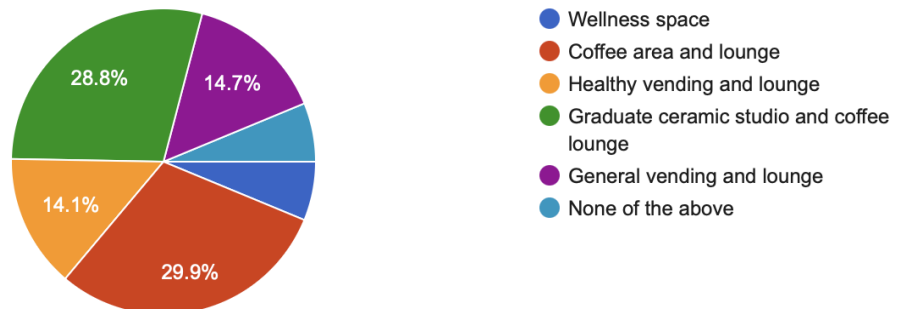

respondents were asked what they would use the most, both the coffee area and ceramics studio were selected.

Realistically, which would you be most likely to use?

 [Copy chart](#)

177 responses

Ceramics and coffee area seems to be the most popular option

#### 4. Meadows package thefts:

Someone (a resident) was charged last week for stealing packages and might have stolen many that have gone missing.

Can we collect information (voluntarily) on how many packages have been stolen? We will also encourage reports to Public Safety.

- Any other solutions that have been found to work at other residences?
- Continue keeping information more close to public safety
  - keep encouraging people to submit to public safety

#### 5. Trash cans in garage:

Facilities won't put trash cans in the garage because no one currently is responsible for the general upkeep of the garage.

Students would prefer putting trash cans in the garage

Need some stats on foot traffic through the garage

#### 6. Signs

People are still worried about the packages being put in the wrong location. Want to put a sign like the one below

People still disregard signs so might be low utility

Will put the signs up for a test run to see how impactful it is

Below...

Burka Aydin: More control over the AC unit?

Issue with installation. Call maintenance and see if the installation is correct or not.

Environmental control over the thermostat, Princeton.

HVAC is dependent on the temperature outside. If it is lower than a threshold, heating turns on, if it is higher than the threshold, the ac turns on. You can turn off the system. If you turn everything off, the system would completely turn off.

Certifications need to meet to be a environmentally friendly buildings

MacKenzie: Undergrads are moving in temporarily (rumored permanently too?). Special circumstance undergrads (military, married) can live in grad housing (typically Lawrence), but not in Meadows.

Seraya: Remind people to clean up after themselves and their pets. This is a term of their pet agreement (remind them of this)

Leaving stuff in random places as they move out. What happens to it. Discard items themselves.

Mattresses and large furniture should be arranged by the resident to find a removal contractor. Facilities will not be discarding mattresses and other large furniture.

bus stop location is kinda far. Charter buses can come in front common area so why can't Princeton do this too? Don't do this because it is hard to drive around this area. Too difficult to turn around and with fire lane parking issues. Likely not going to be changed

Art installation starts next week at 10 am! Will the walls be painted (not our problem they will clear it out).

Walls in older buildings will have pieces from the Princeton Museum.

# **This is Building B.**
